SOME SENSEX STRIKE Price Band				Informational Analysis of INDEX Price Behavior Note: Price levels use past option data for study only. Not trading advice. Trading risks all capital. Consult a SEBI advisor. Price levels come from past option data to show market patterns for learning. Primary and Secondary Levels help study price moves in a day. Plot levels to learn market trends. These zones may be visualized on charting platforms to help learners analyze intraday market structure and behavioral tendencies, such as price consolidation, reactions, or expansions. Big gap openings may shift patterns. Focus on the nearest price level to study new trends . For study only, not trading advice.
